THE "FOUR-NINETY" is a real automobile. It has a quiet, powerful, VALVE-IN-HEAD Motor. It has looks---it has style---it is beautifully finished and rides like a cradle.

THE "FOUR-NINETY" has the following novel and superior features not found in any other car built:

(1) Shock-absorbing duplex front springs; (2) Self-lubricating clutch collar; (3) Hub construction with triple-size bearings, preventing "wobble" of wheels and wear on tires; (4) Compound spur steering gear attached to body---the simplest and safest ever invented;

(5) Unit power plant carrying transmission on open brackets, which gives accessibility to clutch and allows removal of all transmission, if necessary, in twenty minutes. (Patents granted or applied for on the above.)
